Preliminary Findings on Homeless Service Use and Medicaid Spending in New Jersey

2017 Governor’s Conference on Housing and Economic Development

October 5, 2017

UPDATED October 16, 2017

Atlantic City, NJ

Joel C. Cantor, ScD
Distinguished Professor of Public Policy
Director, Center for State Health Policy
Institute for Health, Health Care Policy, and Aging Research
Acknowledgement

Support of The Nicholson Foundation and the New Jersey Division of Medical Assistance and Health Services (DMAHS) is gratefully acknowledged.

The project team includes Jose Nova, Derek DeLia, Sujoy Chakravarty, Oliver Lontok, and Margaret Koller of Rutgers Center for State Health Policy and Katelyn Cunningham, Taiisa Kelly, and Richard Brown of Monarch Housing Associates.

We thank Meghan Davey, Felicia Wu and Dianna Rosenheim of DMAHS, Catherine Brewster of the NJ Housing and Mortgage Finance Agency, and Paul Rossi of Foothold Technologies for their assistance and encouragement.

The views expressed in this presentation are exclusively those of project team, and may not reflect those of the project sponsors or the state agencies contributing data.

Project Goals

1. Link 2011-16 data from the Homeless Management Information System (HMIS) to the Medicaid Management Information System (MMIS).
2. Identify opportunities to generate Medicaid savings and improve patient outcomes among Medicaid beneficiaries who use homeless services.
3. Estimate the impact on Medicaid spending of permanent supportive housing placement.
4. Engage state officials and other interested stakeholders.
A Few Project Specifics

• HMIS data from the NJ Housing and Mortgage Finance Agency
  – Housing services, client characteristics
  – All counties for some services (e.g., emergency shelters) and 19 of 21 counties for other services (e.g., supportive housing).

• MMIS data from NJ Div. of Medical Assistance and Health Services
  – Beneficiary characteristics, service use, spending
  – All NJ Medicaid beneficiaries

• Data for 2011-2016 linked using client/beneficiary IDs under inter-agency Data Sharing Agreement

• De-identified linked data shared with Rutgers for analysis under Data Use Agreements and approval of Rutgers Institutional Review Board
The Study Population & Focus for Today

Medicaid

Medicaid, Not HMIS

Medicaid & HMIS

HMIS

Note: Not to scale
Number and Percent of Medicaid Beneficiaries in HMIS

Number (bars) | Percent (line)
--- | ---
2011 | 37,797 | 2.4%
2012 | 40,114 | 2.5%
2013 | 45,638 | 2.9%
2014 | 58,097 | 3.0%
2015 | 65,707 | 3.1%
2016 | 64,717 | 3.0%

Medicaid expansion
Demographics of Medicaid Beneficiaries by HMIS Status, 2015

- Age Group:
  - <18: 41.2% (Not HMIS), 28.7% (HMIS)
  - 18-24: 10.4% (Not HMIS), 9.6% (HMIS)
  - 25-60: 38.2% (Not HMIS), 36.2% (HMIS)
  - >60: 10.3% (Not HMIS), 5.4% (HMIS)

- Gender:
  - Female: 55.0% (Not HMIS), 54.7% (HMIS)

- Race/Ethnicity:
  - White: 36.0% (Not HMIS), 32.6% (HMIS)
  - Black: 49.7% (Not HMIS), 22.5% (HMIS)
  - Hispanic: 21.8% (Not HMIS), 12.2% (HMIS)
  - Asian: 3.8% (Not HMIS), 0.4% (HMIS)
  - Other: 15.6% (Not HMIS), 5.0% (HMIS)

Composition of Medicaid Spending* by HMIS Status, 2015

*Spending not adjusted for number of months enrolled. LTC = long-term care services.
Summary of Preliminary Results So Far

• About 2.5% to 3% of Medicaid beneficiaries appear in HMIS annually, including 38,000-68,000 individuals, there was >25% increase after expansion

• The linked population:
  – More likely to be ages 25-60, less likely to be kids or 60+
  – Much more likely to have substance use, substance use+mental health diagnoses, and Serious Mental Illness
  – Higher users of inpatient and ED care
  – About 30% higher average Medicaid spending & more likely to be in higher spending group
  – Higher hospital and pharmacy spending, lower LTC spending

Stay Tuned,
Much More to Come!
